

# Way Portable Electric Drills

Aluminum housing finished inside and out.

Ventilating inlet holes so placed as to assure efficient cooling.

Standard make switch, well protected and easily controlled.

Cable—15 feet, rubber reinforced, positively locked by ribbed taper jaws.

Socket plug armored to withstand abuse.

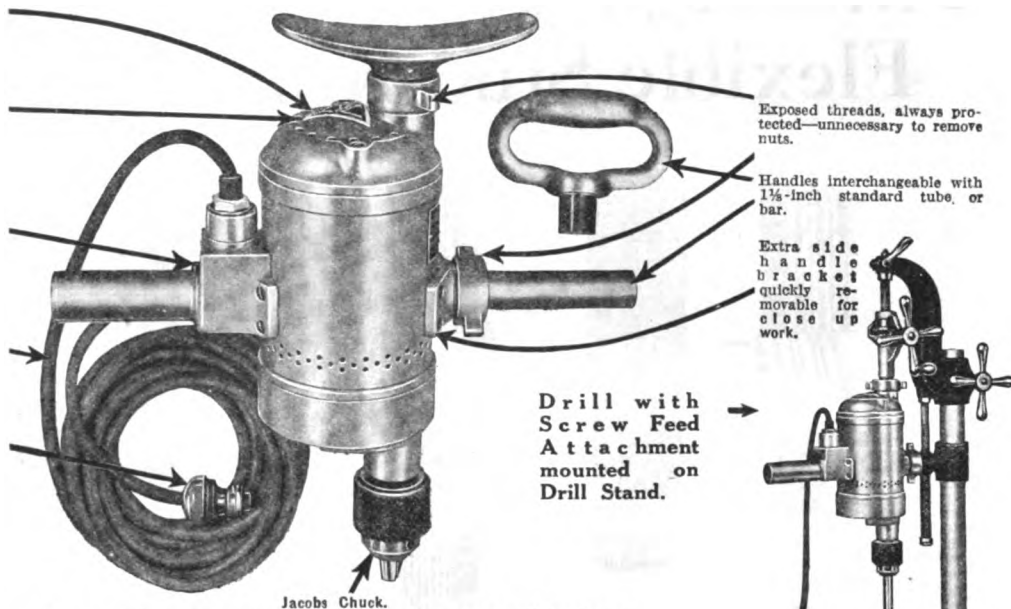

## Other Distinctive Features

Motor bearings—ample, efficient, durable—good for months of use with initial oiling and sealed against oil leakage. No "shop standards" nor special threads.

The rocker ring construction (mounting General Electric Co. 500 hr. brushes) assures exactness of adjustment.

The drill may be dissembled and reassembled complete in about 15 minutes. General Electric Co. Universal Motor.
